WHAT'S NEW FROM ICE TRIKES

ICE HANDCYCLES

The NEW ICE Trikes Handcycle is built for comfort, practicality and adaptability. Experience the freedom of recumbent cycling in a new way with the NEW ICE Handcycle, designed to deliver comfort, performance, and cycling independence in every ride

PERS - CHAINLESS PEDALLING SYSTEM

The PERS Chainless pedalling system is a clean, maintenance-free, completely chainless e-assist system that converts human pedalling into propulsion through electricity. Think of it like, cycle by wire! The system has no chain or drivetrain and works through electricity alone

NEW

SPRINT X PIXEL & SPRINT X 20"

The Sprint X Pixel is perfect for shorter riders offering a more compact option than the standard model. A compact 20" rear-wheeled trike with natural handling that delivers an agile, sporty, and adventurous riding experience. **The Sprint X will also be available with 20" wheels**, making it a lightweight, sporty and compact trike with exceptional handling

10-YEAR TRANSFERABLE WARRANTY

ICE Trikes is proud to be able to now offer all new trikes will come with not just a free 10-year extended warranty, but now a fully transferable warranty! Now, a second owner can also benefit from this peace of mind

Powered by

ICE TRIKES, EMPLOYEE OWNED

For more than three years, we've been proudly employee owned, a milestone that marks not only a change in structure, but a transformation in how we work, grow, and support one another. Becoming an employee-owned business has strengthened our commitment to transparency, shared responsibility, and long-term stability.

ICE WAS ESTABLISHED BY NEIL SELWOOD AND CHRIS PARKER IN 1998

They were driven by a passion to build the ultimate recumbent trikes and deliver exceptional customer service, we continue from our Cornwall headquarters to share the joy of ICE trikes with customers in 32 countries worldwide.

THE VTX HAS WON NUMEROUS WORLD RECORDS AND WINNER OF THE 2025 WHPVA CHAMPIONSHIPS

We all know the ICE VTX is the trike you ride if you want to go fast. The VTX has proven again its race winning performance being ridden to victory by **Philippe Descubes** and **Jimmy Hubbard** in the **2025 WHPVA mens** unfaired multi-track trike category in Italy.

Michael Ricci set six new world records in Death Valley, California, with his ICE VTX over the 200-miles.

Caleb Cline from Las Vegas set 10 WUCA world records in a 24hr road cycling event. He cycled 322.91 miles in a 24hr period on Nevada's public roads achieving 10 world records at the time and in 2026 he set 10 new Guinness World Records riding virtually on Zwift. In a world first, Caleb rode over 436 miles in a 24hr period.

Jochem Leemans from the Netherlands set two WUCA world records on the ICE VTX for fastest trike rider over 100 miles in 3hrs 54 minutes.

EASY-TO-BUY TRIKE RANGE

Choosing the right trike should be exciting - not overwhelming. But let's be honest: brakes, gearing, motor options... it can quickly turn complicated. We've taken everything we've learned as passionate trike enthusiasts and distilled it into a range of expertly pre-configured builds. No guesswork. No second-guessing. Just seriously good trikes!

Every model has been carefully put together by a team who live and breathe this stuff - people who know what works, what doesn't, and what makes a ride truly exceptional.

WHAT DOES THAT MEAN FOR YOU?

It means you can skip the endless options and go straight to the good part: riding.

- Perfectly matched components - brakes, gearing, specs all dialed in
- Tried, tested, and loved by real riders
- Beautifully considered setups that just work
- Less time choosing, more time riding

BUILT BY ENTHUSIASTS, FOR RIDERS

These aren't random bundles. They're set-ups we'd ride ourselves. Whether you're new to triking or a seasoned rider, these models remove the friction and deliver a confident, ready-to-roll choice.

Think of them as your fast track to a brilliant ride.

PICK ONE. RIDE OUT. ENJOY.

You can still customise if you want to, but now you don't have to, because sometimes the best option... is the one that's already been perfected.

A person is seen from behind, riding a red trike on a sandy beach. They are wearing a black jacket, grey shorts with pink trim, and a black and pink helmet. The trike has a black seat with 'ICE' branding and a red frame. The background shows a blue ocean with a small ship on the horizon under a blue sky with white clouds.

EXPLORE-ENJOY-DISCOVER

E-ASSIST

BEAUTIFULLY BUILT INTO OUR TRIKES, THE SHIMANO E-BIKE SYSTEMS GIVES YOU THE PUSH TO EXPLORE FURTHER

SHIMANO EP8 OR EP6 CARGO E-BIKE SYSTEMS

All ICE folding trikes are available with the powerful Shimano EP801 or EP6 Cargo E-Bike Systems. For those who are not confident in changing gear, there is also an optional fully automatic electronic gear shifting systems available, available on most models.

The optional Shimano E-Bike systems are fully integrated into the ICE Adventure, Adventure HD, Sprint X Tour, Sprint X and Full Fat trike models. You can still fold your trike with e-assist.

With a powerful electric motor mounted at the front of the trike, the battery mounted under the seat, a handlebar-mounted controller, and a well protected wiring loom, the whole system blends in and keeps your trike looking as great as ever.

SHIMANO
E-BIKE
SYSTEMS

EP8 EP6
CARGO

SHIMANO MOTOR SYSTEM AND COMPONENTS

CYCLING COMPUTER AND CONTROLLER

The computer and its control unit have a clear and intuitive interface, Bluetooth connectivity, loaded with functionality. The computer will keep you up to date with all the information you need throughout your ride. The system runs, as standard, with Shimano Di2 software. This allows ICE dealers to quickly and simply run diagnostics tests if ever needed.

CONTROLLER

DRIVE UNIT

The Shimano E-Bike system includes a powerful motor with a smooth output. Providing a seamless and easy ride from a standing start, simply pedal as normal and the motor will assist at your preferred level. Shown below with optional lighting.

DRIVE UNIT

BATTERY

The system comes with a high quality Shimano lithium-ion battery. Locked to the low stable mounting point, tucked away behind the seat, the powerful 630Wh battery can be conveniently charged in situ or away from the trike. A second optional battery mount is available to mount an additional battery on the back of the Ergo-Luxe and Ergo-Flow seats.

BATTERY

SHIMANO EP8 OR EP6 CARGO E-BIKE SYSTEMS

Power your cycling with the EP801 or EP6 Cargo motor system. The system features a powerful 250w, 85Nm electric motor. All the power you need at just the right time. Smooth direct power, responsive, quiet, lighter in weight and fully controllable. All the power and confidence you need to explore where the road takes you. The Cargo version of the motor system has been optimized to deliver full power from the first pedal stroke.

Choose between Boost, Trail, Eco and intelligent Walk modes. Bluetooth technology lets you customise and adjust riding modes and settings conveniently from your smart phone. Different gearing solutions are available to choose from; mechanical derailleur gearing, Shimano XT Di2 electronic, Nexus Inter 5e automatic / manual hub and the Rohloff 14 speed hub gearing are all available to suit your riding style.

EP801 AND EP6 SPECIFICATIONS

- 3 Levels of assist: Boost, Trail and Eco
- Intelligent walk assist mode
- 85Nm torque
- Lightweight at only 2.7kg or 2.9kg
- Quieter operation
- Customize your ride
- 36v/17.5Ah (630Wh) battery
- 36% less drag
- Assists up to 25 km/h (15.7 mph) in EU and UK, 20 mph in USA

SECOND OPTIONAL BATTERY MOUNT

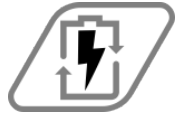

INTEGRATED LIGHTS

Optional high-power lights are available fully integrated into the Shimano STEPS system. They can also be used in the day time for extra visibility.

PERS CHAINLESS PEDALLING SYSTEM

PERS CHAINLESS PEDALLING SYSTEM

NEW for 2026! The PERS Chainless pedalling system is a clean, maintenance-free, completely chainless e-assist pedalling system that converts human pedalling into propulsion through electricity. Think of it like, cycle by wire! The system has no chain or drivetrain and works through electricity alone. More pedaling, more power. More power, more speed!

Riding an ICE PERS equipped trike, feels intuitive, natural and simply exhilarating. The speed is instant. No gear shifting, reverse pedalling, clean and maintenance-free, regenerative braking, smooth silent operation, smartphone connected and with anti-theft technology. Powerful 250w rear hub motor, 75nm of torque, 5 power settings and a 700wh battery let you ride more with ease.

Game-changing technology, the future has arrived! And it's quick!

PERS E-ASSIST SYSTEM FEATURES

- 5 Power Modes: Muscular, Active, Balanced, Punch, or Dynamite (0-400% assist levels)
- 250w hub motor mounted in the rear wheel
- 75Nm torque
- 700wh Battery
- Assist level up to 25 km/h (15.7 mph) in EU and UK, 20 mph in USA
- 0-20mph in under 3 seconds in Dynamite mode!*
- Range: We estimate a range of 40-60 miles*

* Speed tested to 20mph on a US spec system.
System available in regions where we can ship batteries.
Range dependant on riding conditions, environmental factors and assist level

NO GEAR SHIFTING AND PEDALLING SPEED

The PERS Chainless system offers natural pedaling resistance that adapts instantly to your riding style. Every pedal stroke generates energy. Simply choose your preferred rhythm and pedalling speed (cadence) and enjoy the ride. It adjusts to you in real time, automatically, without any gear shifting. You can even adjust the cadence while riding.

PEDAL BACK TO BRAKE AND CHARGE THE BATTERY

The system captures energy when you brake and it's stored in the battery. Pedal backwards when you're riding to slow down and recharge the battery at the same time.

Energy from braking as you ride flows back to the system, extending your range. This could extend your cycling range by up to 25%. Gently pedal backwards and the system starts to brake and in the process captures energy.

PERS **CHAINLESS** PEDALING SYSTEM

A WORLD FIRST FOR THE
RECUMBENT TRIKE INDUSTRY!

AS PREVIEWED AT EUROBIKE
2025 IN GERMANY AND AT CABDA
2026 IN LAS VEGAS

Powered by

A woman with long dark hair, wearing a white helmet and a white tank top, is riding a red recumbent bicycle on a city street. She has visible tattoos on her arms and is smiling broadly at the camera. The bicycle has a red frame, black tires, and a black seat. The background shows a brick building and a black lamppost.

ENJOY-CYCLING-MORE

A photograph of two men riding recumbent bicycles on a city street. The man in the foreground is wearing a blue jacket, dark pants, and an orange helmet. The man behind him is wearing a green jacket, blue jeans, and a white helmet. They are both smiling and looking towards the right. The background shows a city street with trees, buildings, and a red postbox.

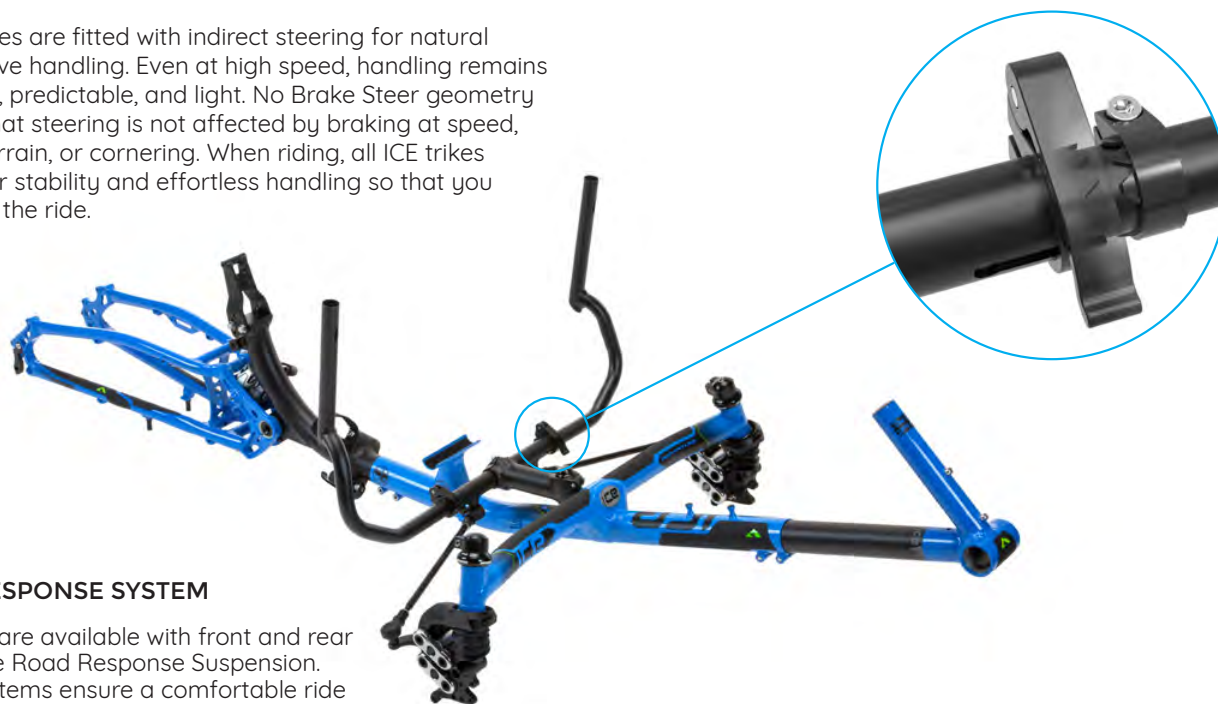

EXPLORE-YOUR-WORLD

DESIGNED FOR YOU

BECAUSE THE DETAILS MATTER

Our designers spend hours considering every detail. Our painters refuse to accept anything but the finest finish. The result: a trike which looks sublime, rides with smoothness and precision, and stands the test of time.

All ICE trikes are fitted with indirect steering for natural and intuitive handling. Even at high speed, handling remains controlled, predictable, and light. No Brake Steer geometry ensures that steering is not affected by braking at speed, uneven terrain, or cornering. When riding, all ICE trikes retain their stability and effortless handling so that you can enjoy the ride.

ROAD RESPONSE SYSTEM

ICE trikes are available with front and rear adjustable Road Response Suspension. These systems ensure a comfortable ride without compromising power transfer or handling. Designed to be effective, durable, and reliable, the only thing you'll notice is the smooth ride with 1.5" (40mm) of front travel and 4" (100mm) of rear.

RIDER POSITIONING SYSTEM

A great ride starts with a well-fitted trike. The position of the cranks, seat, and handlebars can be easily adjusted. Contacting parts are hard black anodised to prevent cosmetic wear. Custom brackets, and a choice of cranks and seat types go further to ensure the perfect fit for you.

SWEPT CRUCIFORM, WIDER COCKPIT & SECURE INDEXED HANDLEBAR CLAMPS

ICE Adventure and Adventure HD feature handlebars which allow for a wider, roomier cockpit. All ICE Trike models feature an easy access swept cruciform. A handlebar clamping system for all our folding trikes features secure indexed clamps, ensuring easy handlebar alignment when folding and unfolding and solid handlebar positioning while riding.

GREAT LOOK AND A GREAT DESIGN

All ICE Trike models feature our easy access swept cruciforms. Allowing you to get your feet further under you for a more stable entry and exit of the trike. They have a slightly raised seat position by 12mm (except the VTX) this allows for clearer access to remove the seat when folding the trike, this also creates improved heel clearance for smaller riders.

HOW THE CRUCIFORM COMPARES

The updated cruciform overlaid on top the ghosted previous cruciform, shows the extra heel clearance generated by the swept design.

OPTIMISED FRAMES

THE HEART OF A SUPERIOR TRIKE IS AN ICE OPTIMISED FRAME

Fundamental to the way ICE trikes perform, handle, and feel are geometry and materials. Our frames are designed to respond to the forces of rider and road. They incorporate press-forged rear drop outs, CNC-machined kingposts, and finest 7005 aluminium and 4130 chromoly steel tubing. Every element of the frame has been engineered to complement the other, giving ICE trikes their famed riding characteristics.

Each frame is powder coated for a perfect finish, whilst interfacing components are anodised for durability; ensuring that parts stay showroom fresh for years to come.

REAR SECTION

7005 T6 heat treated aluminium absorbs dynamic forces while ensuring maximum power transfer. The geometry is meticulously designed and features an asymmetric profile to fit a stronger un-dished wheel. Geometry and set up ensure that suspension is not affected by chain tension.

CRUCIFORM

Aircraft-grade heat-treated 4130 chromoly steel provides ideal qualities for the cruciform: strength, fatigue resistance, and vibration absorption. The design exploits these properties to give unique handling characteristics and superior comfort.

BOOM

The boom is made from lightweight, high strength, 7005 T6 heat-treated aluminium alloy. The front derailleur post is powder-coated, and the frame interfacing given a tough black anodised finish. Laser etched markings assist you in finding your ideal boom position.

FOLD YOUR TRIKE IN LESS THAN 30 SECONDS

COMPACT FLAT TWIST FOLD

The ICE Compact Flat Twist fold is one of the many innovations that ICE has brought to the recumbent world. The fold is based around a lightweight heat-treated aluminium hinge on the main frame. Simply remove the seat, fold the handlebars flat, and undo the quick release lever to fold the frame. As the frame folds, the rear wheel pivots to fit flat between the front wheels. Works with ICE accessories.

TAILOR-MADE TRIKES

TRIKE MODEL OPTIONS ALLOW YOU TO CHOOSE THE BEST TRIKE TO MEET YOUR NEEDS

REAR WHEEL SIZE

Apart from the visual difference to the trike, rear wheel size plays a big part in gearing, and a very small part in handling and speed in different situations.

20" rear wheels allow for low gears, perfect for climbing mountain ranges and for riders with reduced power.

26" wheels allow for high gears and help you hold speed over rough surfaces.

700c wheels are the industry standard for racing bikes, allowing for high gears and fast riding, with a wide choice of tyres available.

26" Fat Tyre (Full Fat only) features an extra wide tyre (up to 4.8") with wide rims and hubs. This allows you to run low pressures to increase traction on soft, loose surfaces such as sand, mud, and snow.

ICE ERGO-LUXE AND ERGO-LUXE SHORT-SEATS - COMFORT REDEFINED

The **Ergo-Luxe** seats are the most comfortable trike seats on the market and the most comfortable you will ever sit on. Beautifully designed to provide the ultimate level of comfort and back support. Breathable fabrics maximise airflow, and ergonomic extra cushioning in the base and sides further enhance comfort. Adjustable tensioning. Integral Sidepod mounts eliminate the need for over the seat straps. A weather-sealed pocket for small items and reflective detailing.

Sprint X Tour, Ergo-Luxe seat. Perfectly designed to match the style of the Sprint X Tour, in grey and black with red detailing including all the features of the standard Ergo-Luxe seat.

The Ergo-Luxe Short seat, shown above left has a shorter back compared to the standard Ergo-Luxe seat, this improves the positioning of the neck rest, making it ideal for riders under 5ft 4" (162cm) tall. The width remains the same as the standard Ergo-Luxe seat.

Available on the Adventure, Adventure HD, Sprint X Tour, Full Fat and previous Sprint models.

QUICK RELEASE NECK REST

NEW for 2026! Easily adjust the neck rest on your trike seats with an easy adjust neck rest. Simply open the QR clamps, slide the neck rest into your preferred position and push to close. No tools required.

Available as an option on Ergo-Flow and Ergo-Luxe seats.

ICE ERGO-FLOW SEAT

The Ergo-Flow seat has been designed to provide optimum back support. The cover features breathable fabrics to maximise airflow, cooling, and cushioning in the base and side bolsters enhances comfort. The tension in the back can be easily adjusted to suit the rider, and there is a handy weather-sealed pocket at the top for small items such as keys and phones. Reflective side detailing keeps you safe at night.

Available on Adventure, Adventure HD, Full Fat and Sprint X Tour.

ICE AIR-PRO COMPOSITE SEAT

Handmade from carbon fibre, the Air-Pro seat has been anatomically shaped to provide a firm base to pedal against, and to hold the rider securely, even through aggressive cornering. Available in two sizes, medium and large. The cover which provides comfort and ventilation is ergonomically designed with padded zones separated by air flow channels. A range of technical fabrics are assigned to each zone for breathability and durability.

Available on VTX, Sprint X and Sprint X Tour.

RIGID FRAMES

ICE Rigid frame equipped trikes exploit material characteristics to maximise performance. All rear frames are made from stiff but light aluminium alloy for good power transfer.

The middle section of the trikes are built from heat treated Cro-Mo Steel. Steel is a particularly good option as it can be optimised to provide an inherent compliance for improved comfort.

EASY ACCESS SWEEP CRUCIFORMS

All ICE trikes feature an easy access swept cruciform. Allowing you to get your feet further under you for a more stable entry and exit of the trike. It has a slightly raised seat position by 12mm (except the VTX) and allows for clearer access to remove the seat when folding the trike, this also creates improved heel clearance for smaller riders.

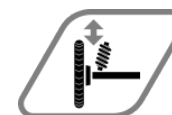

ROAD RESPONSE SUSPENSION

Our Road Response Suspension systems use advanced geometry to deliver a comfortable and controlled ride, adjustable and needing virtually no maintenance performing flawlessly over many thousands of miles.

The 4th generation ICE front suspension works smoothly, even maintaining correct operation under heavy braking with built in “anti-dive” geometry. The latest model has 1.5” (40mm) of travel, offers lifetime zero maintenance and ensures greater durability than ever before.

Our rear Road Response Suspension system has up to 4” (100mm) of travel and can be optimised by simply adjusting the position of, or swapping out the elastomer.

**4TH GENERATION ADVANCED
SUSPENSION SYSTEM**

THE MODELS

VTX

A perfect blend of performance, dynamic handling, and comfort coupled with stunning looks and detailing to create the ultimate trike. With the lowest seating position of all our trikes, the VTX delivers superior performance guaranteed to put a smile on your face.

SPRINT X

The practical cousin to the VTX, the Sprint X is likely the fastest foldable trike available. It features a race wheel set with a 700c or 20" rear wheel and is available with a full range of suspension options, components, and accessories. Designed as the ultimate sports road tourer or commuter trike. Now available with a 20" race wheel option for compact riding.

SPRINT X TOUR

With its sporty ride, comfort and medium height seating position, the versatile Sprint X Tour will guarantee you are ready for the challenge ahead. Featuring a touring wheel set with a 26" or 20" rear wheel. Perfect for fully laden long distance touring or carving bends, pushing your speed on a weekend ride, the Sprint X Tour is a trike for all seasons.

ADVENTURE

Enjoy the relaxed pace of recumbent riding on the beautifully designed Adventure. With its high and accessible seating position, rugged looks, and ride capabilities. The Adventure is primed to cruise the open road, discover hidden trails, and explore new horizons.

ADVENTURE HD

A stronger, wider and larger version of the Adventure, the HD retains the accessible seating position, rugged looks, and ride capabilities. A wider seat to accommodate larger and taller riders ensures a comfortable ride for miles to come.

FULL FAT

An expedition-tough trike, originally designed for Antarctic record setting, the Full Fat combines durability, reliability, and specialist features for conquering the most challenging terrain. Rough trails, sand, snow, and mud; if you pedal, it'll take you there.

SPRINT PIXEL

The Sprint X Pixel is perfect for shorter riders. A compact 20" rear-wheeled trike with natural handling that delivers an agile, sporty, and adventurous riding experience. For riders from approx. 4ft 6in tall and over.

ICE HANDCYCLE

The NEW ICE Trikes Handcycle is built for comfort, practicality and adaptability. Experience the freedom of recumbent cycling in a new way with the NEW ICE Handcycle, designed to deliver comfort, performance, and cycling independence in every ride. The Handcycle is available as Adventure HD & Sprint X Tour Handcycle Models.

OPTIONS AVAILABLE

THE VTX IS THE TRIKE YOU NEED IF YOU LIKE TO GO FAST. REALISE YOUR AMBITION FOR SPEED. SLEEK, LEAN, AND FINELY TUNED, THE ICE VTX DELIVERS SUPERIOR PERFORMANCE FOR THE MOST EXACTING RIDER

Super-charged with technical expertise and specialist knowledge, the ICE VTX is a different breed of recumbent trike. ICE VTX trikes are built on an optimised ICE frame featuring our No Brake Steer and Rider Positioning System.

LIGHTWEIGHT BUILD

Incorporating considered design and specialised components, such as a lightweight boom and carbon fibre Air-Pro seat, lightweight wheels, the VTX can weigh less than 30.4lbs (13.8kg) on the road.

NATURAL HANDLING

An optimised cruciform and one piece handlebar provides stability and nimble handling no matter what the speed.

MATT BLACK COLOUR SCHEME OR GO CUSTOM!

The dynamic matt black colour scheme, paired with custom white and red graphics, makes the VTX look as sleek, light, and fast as it rides. And for those wanting something more personalised, you can also choose from our wide range of colour options to create a look that's uniquely yours.

WINNER OF NUMEROUS WORLD RECORDS AND THE 2025 WHVPA CHAMPIONSHIPS

See page 6 for more details.

RACE COMPONENTS

Advanced race components and customised features, such as the oversize pulley, effectively convert pedalling effort into speed.

SEATING

Fitted with the ICE Air-Pro seat, handmade from carbon fibre. The Air-Pro seat has been anatomically shaped to provide a firm base to pedal against, and to hold the rider securely, even through aggressive cornering. Available in large or medium sizes.

HYDROFORMED

Beautifully sculpted, the hydroforming process gives the back-end optimal strength and stiffness while remaining lightweight.

CUSTOM LIGHTWEIGHT RACE WHEELS

Black state of the art custom lightweight race wheels are lighter than the previous VTX wheels. They have a modern aero section profile. The wheel set features a 700c rear wheel, they are available in reliable low maintenance drums or powerful lightweight discs. Tubeless ready.

AERODYNAMICS

The low Air-Pro carbon fibre seat position and recline angle as little as 25° minimises frontal area and reduces aerodynamic drag.

EASY ACCESS SWEEP CRUCIFORM

ICE VTX features our easy access swept cruciform for improved heel clearance.

WIDTH	29.5" (750mm)
LENGTH	81.5" - 90.2" (2070mm - 2290mm)
WEIGHT FROM	30.4lbs (13.8kg)

OPTIONS AVAILABLE

THE SPRINT X IS LIKELY TO BE THE FASTEST FOLDABLE TRIKE AVAILABLE. THE SPRINT X IS THE ULTIMATE SPORTS TOURING TRIKE, IT IS AVAILABLE WITH SUSPENSION, PERFORMANCE COMPONENTS AND ACCESSORIES AND COMES IN TWO COLOURS

Excite your cycling passion with the ICE Sprint X. All trikes in the ICE Sprint X range are built on an optimised ICE frame featuring Compact Flat Twist Fold, No Brake Steer, and Rider Positioning System.

WIDTH	31.5" (800mm)
LENGTH (700c)	81.4" - 90" (2067mm - 2286mm)
WEIGHT FROM	36.3lb (16.5kg)
SEAT HEIGHT	7" (180mm)
SEAT ANGLE	28 - 35 degrees
RIDER WEIGHT LIMIT	(Air-Pro seat) 229lbs (104kg)

PERFORMANCE COMPONENTS

The Sprint X is fitted with superior race components to give enhanced performance and proven durability.

AVAILABLE IN TWO STOCK COLOURS OR GO CUSTOM!

Available in two stock colours, the Sprint X now comes in a vibrant Passion Red with white detailing and the classic, refined Gunmetal Grey finish with red graphics and highlights. For those wanting a more personalised look, you can also choose from our wide range of custom colours to create a finish that's uniquely yours.

C.F.T. FOLD

Featuring the practical touch of a folding frame in a race-specification trike makes the Sprint X as practical as the Sprint X Tour. Fold your trike in less than 30 seconds.

AERODYNAMICS

A low seat position and recline angle to 28° minimises frontal areas and reduces aerodynamic drag.

BRAKE OPTIONS

The race wheel set available in reliable low maintenance drums or powerful lightweight discs.

SHIMANO E-BIKE SYSTEMS

For the first time the Sprint X is available with two powerful Shimano motor systems, which allows you to cycle for longer with ease.

SEATING

Fitted with the ICE Air-Pro seat, handmade from carbon fibre. The Air-Pro seat has been anatomically shaped to provide a firm base to pedal against, and to hold the rider securely, even through aggressive cornering. Available in large or medium sizes.

EASY ACCESS SWEEP CRUCIFORM

Sprint X models feature our easy access swept cruciform, creating improved heel clearance and making it even easier to get on and off the trike.

CUSTOM LIGHTWEIGHT RACE WHEELS

The black, state-of-the-art custom lightweight race wheels are even lighter than the previous VTX wheels and feature a modern aero-section profile for improved aerodynamic performance. The current wheelset includes a 700c rear wheel, with a **NEW 20" wheel option available.**

SPRINT X PIXEL - BEAUTIFULLY PROPORTIONED CYCLING FOR SHORTER RIDERS

The Sprint X Pixel is perfect for shorter riders. A compact 20" rear-wheeled trike with natural handling that delivers an agile, sporty, and adventurous riding experience.

For riders from approx. 4ft 6in tall and over, available in two stock and Custom Collection colours.

OPTIONS AVAILABLE

**SPORTING PERFORMANCE AND LAID-BACK COMFORT
COMBINE IN THE VERSATILE ICE SPRINT X TOUR. WHETHER YOU'RE
CARVING BENDS, PUSHING YOUR SPEED, OR ON A LONG DISTANCE
TOUR, YOU'LL BE READY FOR THE CHALLENGE AHEAD**

The specialised cruciform geometry of a Sprint X Tour is enhanced with a wealth of technical features designed to deliver sporting performance, agile handling, and everyday practicality.

All trikes in the ICE Sprint X Tour range are built on an optimised ICE frame featuring Compact Flat Twist Fold, No Brake Steer, Rider Positioning System, and are available with wide range gearing.

COMFORTABLE, PRACTICAL EVERYDAY USE

Suspension or hard-tail trike options available, giving a smoother ride or sporty style. A variety of mounting points make it easy to fit racks, bags, and other accessories for everyday practicality and long distance sports touring.

AVAILABLE IN TWO STOCK COLOURS OR GO CUSTOM!

Available in two stock colours, the Sprint X now comes in a vibrant Passion Red with white detailing and the classic, refined Gunmetal Grey finish with red graphics and highlights. For those wanting a more personalised look, you can also choose from our wide range of custom colours to create a finish that's uniquely yours.

DYNAMIC HANDLING & SPORTS POSITIONING

A low centre of gravity ensures excellent stability even when cornering at high speed. It's lower and more agile, with a dynamic riding position, the sports positioning of the Sprint X Tour encourages a fast paced ride.

RELAXED RECLINE

The relaxed seat angle can be easily adjusted on the Ergo seats to one of four positions between 37° and 44°. A lower seat recline angle to 28° is possible using the Air-Pro hardshell seat, this smaller frontal area reduces aerodynamic drag.

TOURING WHEEL SET

Featuring the practical, tough, touring wheel set, box sectioned, eyeletted with a 26" rear wheel that is great for road, trail and touring riding.

SEATING OPTIONS

A fresh sporty designed, super comfortable, luxurious trike seat. Designed to match the style of the Sprint X Tour, in grey and black with red detailing. The Ergo-Luxe seat provides the ultimate level of riding comfort and ergonomic cushioning while breathable fabrics maximise airflow. The Ergo-Flow and Air-Pro seats are also available.

E-BIKE SYSTEMS

The Sprint X Tour is available with two powerful Shimano E-Bike motor systems and the new PERS Chainless system.

WIDTH	31.5" (800mm)
LENGTH	81.4" - 90" (2067mm - 2286mm)
WEIGHT FROM	36.3lb (16.5kg)
SEAT HEIGHT	7" (180mm)
SEAT ANGLE	28 - 44 degrees
RIDER WEIGHT LIMIT	(Ergo seat) 275lbs (125kg) (Air-Pro seat) 229lbs (104kg)
PIXEL RIDER HEIGHT	Shorter riders from 4ft 6" (138cm)

AVAILABLE WITH:

The Shimano E-Bike Systems logo is located in the bottom right corner. It features the word "SHIMANO" in a bold, blue, sans-serif font. Below it, "E-BIKE" is written in a larger, bold, blue, sans-serif font, with a horizontal line through the "B". At the bottom, "SYSTEMS" is written in a smaller, blue, sans-serif font.

SPRINT X TOUR

New for 2026! The NEW ICE Trikes Handcycle is built for comfort, practicality and adaptability. Experience the freedom of recumbent cycling in a new way with the NEW ICE Handcycle, designed to deliver comfort, performance, and cycling independence in every ride.

Active, sporty and agile accessible cycling. The engineered recumbent position provides a supportive ride, while the accessible seat height and open cockpit make transfers and everyday use much easier for riders with a physical disability or for rehabilitation. Enjoy leisurely road rides to active trail adventures; the handcycle combines rugged capability with smooth, sporty performance and efficient handling.

AGILE-ACCESSIBLE-CAPABLE

THE NEW HANDCYCLE IS AVAILABLE IN TWO DISTINCT E-ASSIST MODELS, THE ADVENTURE HD HANDCYCLE AND THE SPRINT X TOUR HANDCYCLE. FEATURING ALL THE CORE BENEFITS OF THE ICONIC TRIKE MODELS, NOW IN A HANDCYCLE

The handcycles features an innovative folding entry system that allows for super-easy rider transfer, adjustable pedalling position, and a small turning radius compared to other handcycles.

Both models include EP801 motor systems, rear suspension, push-button electronic Nexus Inter 5E Di2 hub gearing and they even fold for easy transport.

Both models are ideal for road, trail and active sports use with their high to medium ground clearance, ride capabilities with indirect steering for natural and intuitive handling from the very first ride.

COMPACT FLAT TWIST FOLD

The Compact Flat Twist fold is one of the many innovations that ICE has brought to the recumbent world. The fold is based around a lightweight heat-treated aluminium hinge on the main frame. Meaning the Handcycle can be easily folded for transporting in a car and for storing your trike. No tools required.

SHIMANO EP801 CARGO MOTOR SYSTEM AND NEXUS 5E DI2 HUB GEARING

The ICE Handcycle is available with the Shimano EP801 Cargo E-Bike motor system. All the power you need at just the right time. Responsive, quiet, lightweight and controllable. The Nexus Inter 5e is an internal hub gearing system that provides manual and fully automatic electronic gear changing at the push of a button.

**FOLDING FOR EASY TRANSPORT,
NO TOOLS REQUIRED**

UPRIGHT SEATING

The Ergo-Flow Handcycle seat has been designed to provide optimum support. It is lightweight and breathable which is ideal for warmer climates and active cycling. Featuring a more upright riding position suited to handcycling, the seat is also adjustable, offering four different seat angle positions.

Breathable fabrics maximise airflow and cooling. Additional cushioning in the base and side bolsters further enhances riding comfort and support. All seats feature a handy top weather-sealed pocket for storing small items such as keys and phones.

OPTIONS AVAILABLE

ADVENTURE HD

WIDTH	33.4" - 34.4" (848 - 875mm)
LENGTH	66.9" - 85.8" (1700mm - 2180mm)
WEIGHT FROM	78.7lbs (35.7kg)
SEAT HEIGHT	15.5" (395mm)*
SEAT ANGLE	54 - 64 degrees
RIDER WEIGHT LIMIT	330lbs (150kg)

*Seat height varies with trike specification.

INNOVATIVE FOLDING ENTRY SYSTEM

Our engineers have created an innovative folding entry system that allows the entire steering and pedals to simply fold forward at the push of a handle. Riders can easily transfer in and out of the handcycle from a wheelchair alongside, without the need for complicated and difficult maneuvers. Once seated, the rider simply pulls back on the handle and locks the system using one control knob. That's it, you're ready to roll.

The pedal position can be adjusted forwards or backwards without the need for tools, allowing the rider to easily set the pedals/cranks in the position that best suits their needs. This can be done at anytime.

SPRINT X TOUR

WIDTH	31.5" - 32.5" (800mm - 825mm)
LENGTH	81.4" - 90" (2067mm - 2286mm)
WEIGHT FROM	35.8lbs (16.2kg)
SEAT HEIGHT	10.1" (256mm)*
SEAT ANGLE	55 - 11 degrees
RIDER WEIGHT LIMIT	275lbs (125kg)

ADJUSTABILITY, CONTROLS AND SUPPORTS

The Handcycle features easy-to-use, ergonomically designed controls. Gearing is controlled either fully automatically or manually using the electronic push buttons. Braking is controlled using the brake levers fitted to both or single sides of the handlebars and uses powerful Sturmey Archer 90mm black drum brakes.

The rider's feet are supported and restrained using the adjustable footrests and straps. A quick-release lever enables easy adjustment of the footrests to allow for different height riders. Additional frame and side pads allow for extra cushioning and support where needed.

The pedal position can be adjusted forwards or backwards, allowing the rider to easily set the pedals in the position that best suits their needs. This can be done at anytime. No tools are required.

SMALL TURNING RADIUS & RIDE CAPABILITIES

Both the Adventure HD and Sprint X Tour* Handcycle models are designed to deliver exceptional manoeuvrability, benefiting from a tighter turning circle than many other types of handcycles. This allows riders to navigate narrow paths, woodland trails and more complex routes with greater ease and confidence.

The world-famous ICE Trikes indirect steering system, combined with no-brake steer geometry, enhances control and precision, ensuring that steering remains smooth and stable even during tighter turns or longer rides. The result is an agile, responsive, comfortable and active riding experience.

ADVENTURE

AVAILABLE IN TWO STOCK COLOURS OR GO CUSTOM!

Choose the colour to suit your personality and style, the Adventure and Adventure HD trikes are now available in two stock colours, a classic blue and a vibrant green!

For those wanting a more personalised look, you can also choose from our wide range of custom colours to create a finish that's uniquely yours.

SYSTEMS

PERS
CHAINLESS
PEDALING SYSTEM

Adventure pictured with optional Shimano E-Bike Systems.

RUGGED-ACCESSIBLE-DEPENDABLE

ENJOY THE LAID-BACK PACE OF RECUMBENT CYCLING ON A BEAUTIFULLY DESIGNED ICE ADVENTURE. CRUISE THE OPEN ROAD, DISCOVER HIDDEN TRAILS, AND EXPLORE NEW HORIZONS

ICE's heritage of innovation and development combine to produce a trike that is beautifully engineered, rides like a dream, and offers practical features for everyday use.

All trikes in the ICE Adventure range are built on an optimised ICE frame featuring Compact Flat Twist Fold, No Brake Steer, Rider Positioning System, and wide range gearing.

GROUND CLEARANCE

A high cruciform gives excellent ground clearance, ideal for road and trail use.

POWERFUL DRUM BRAKES

Sturmey Archer drum brakes give maintenance free performance for up to 10,000 miles between servicing (disc brake option also available).

HIGH SEAT

A high seat position gives easy access to the trike, and a great view of the trail ahead and the scenery around you. The high seat position also makes it easier to get into and out of the trike.

ADJUSTABLE RECLINE

The upright seat angle can be easily adjusted to one of four positions between 38 and 51 degrees.

ADAPTABLE

Mounting points make it easy to fit custom ICE racks, a wide range of bags, and accessories suited for your intended riding.

RUGGED

A durable finish with custom frame protection ensures your Adventure is ready for the challenge ahead.

OPTIONS AVAILABLE

THE ADVENTURE FEATURES, WIDER COCKPIT, ERGO-LUXE SUPER COMFORTABLE SEAT, EASY ACCESS SWEEP CRUCIFORM & SECURE INDEXED HANDLEBAR CLAMPS

ICE Adventure models feature our easy access swept cruciforms. Allowing you to get your feet further under you for a more stable entry and exit of the trike. It has a slightly raised seat position of 12mm and allows for clearer access to remove the seat when folding the trike, this also creates improved heel clearance for smaller riders.

WIDTH	32.5" (825mm)
LENGTH	65" - 73.6" (1650mm - 1870mm)
WEIGHT FROM	36.2lbs (16.5kg)
SEAT HEIGHT	13.5" (343mm)*
SEAT ANGLE	38 - 51 degrees
RIDER WEIGHT LIMIT	275lbs (125kg)

*Seat height varies with trike specification.

E-BIKE SYSTEMS

The Adventure is available with two powerful Shimano E-Bike motor systems and the new PERS Chainless system.

WIDE RANGE OF SEATING OPTIONS

The **Ergo-Luxe** seats are the most comfortable trike seats on the market and the most comfortable you will ever sit on. Beautifully designed to provide the ultimate level of comfort and back support.

Breathable fabrics maximise airflow, and ergonomic extra cushioning in the base and sides further enhance comfort. Adjustable seat back tension. Integral Sidepod mounts. A weather-sealed pocket for small items. Ideal for riders over 5ft 5" (165cm) tall.

The **Ergo-Luxe Short** seat option, shown below left has a shorter back compared to the standard Ergo-Luxe seat, this improves the positioning of the neck rest, making it ideal for riders under 5ft 4" (162cm) tall. The Ergo-Luxe Short seat is an option on the Adventure. The width remains the same as the standard Ergo-Luxe seat.

The **Ergo-Flow** seat is also available for the Adventure.

WIDER HANDLEBARS

The handlebars allow for a wider roomier cockpit, and a handlebar clamping system with super secure indexed clamps to ensure the handlebars easily remain fixed in position at all times. Shown here for comparison with the previous handlebars in grey.

INTEGRAL SIDEPD BAG MOUNTS
ON THE ERGO-LUXE SEATS

ADVENTURE HD

THE ICE ADVENTURE HD APPLIES THE ENGINEERING, DESIGN, AND FUNCTIONALITY OF THE ICE ADVENTURE RANGE, BUT WITH MORE GENEROUS SIZING

AVAILABLE IN TWO STOCK COLOURS OR GO CUSTOM!

Choose the colour to suit your personality and style, the Adventure and Adventure HD trikes are now available in two stock colours, a classic blue and a vibrant green!

For those wanting a more personalised look, you can also choose from our wide range of custom colours to create a finish that's uniquely yours.

OPTIMISED-STRONG-DURABLE

Retaining all of the benefits of the ICE Adventure models, the ICE Adventure HD is built stronger and wider for larger and taller riders.

Overall the trike is 2" wider due to the stronger and wider cruciform that provides a larger cockpit. This is complemented by an HD Ergo-Luxe seat which is 2.5" wider and 2" deeper yet maintains all the features of the standard Ergo-Luxe seat.

HEAVY DUTY

The optimised ICE Adventure HD cruciform is made from 4130 Chromoly steel, strongly built to support riders up to 330lbs (150kg).

LARGE SEAT

Fitted with a wider and deeper Ergo-Luxe seat, the ultimate in riding comfort. The optional Ergo-Flow seat, is lightweight and very breathable.

LONGER X-SEAM

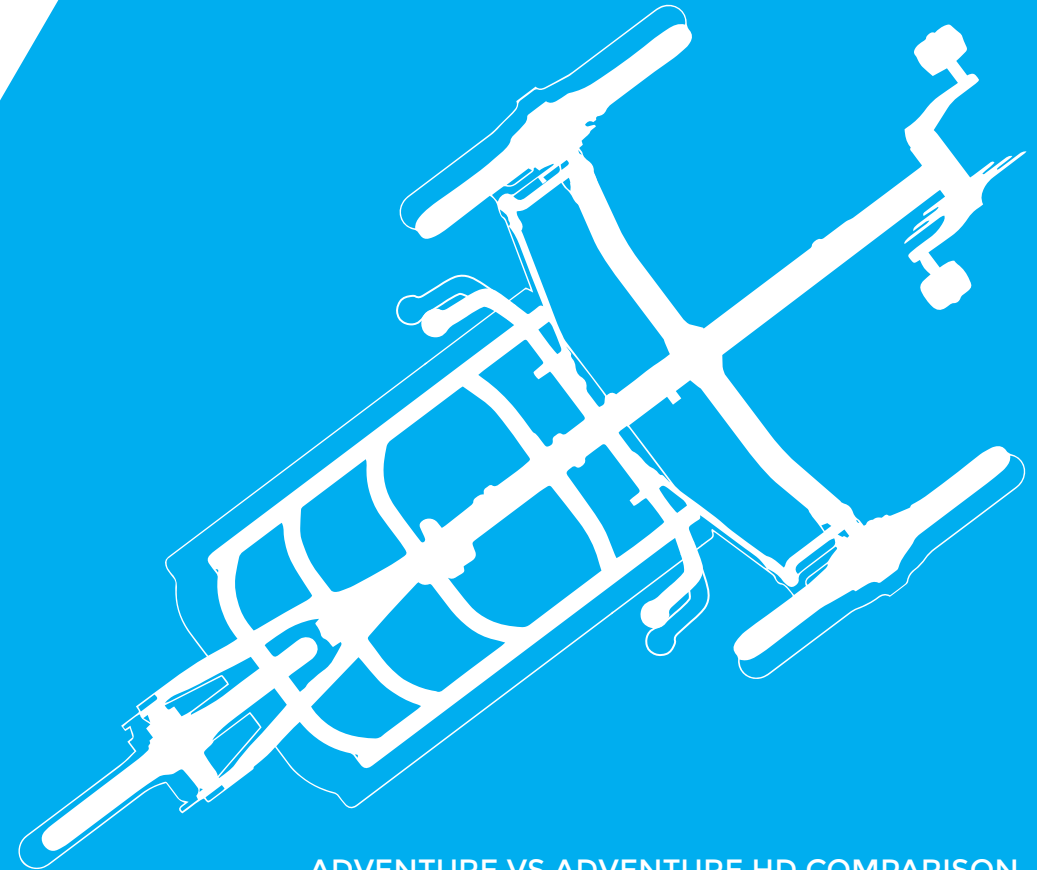

An additional 2" on the x-seam length makes the HD perfect for taller riders.

ADVENTURE VS ADVENTURE HD COMPARISON

OPTIONS AVAILABLE

THE ADVENTURE HD - WIDER COCKPIT, MORE GENEROUS SIZING, STRONG, HIGH RIDING POSITION & SUPER COMFORTABLE ERGO-LUXE SEATING

Adventure HD models feature our easy access swept cruciform, creating improved heel clearance, making it easier to get on and off the trike.

E-BIKE SYSTEMS

The Adventure HD is available with two powerful Shimano E-Bike motor systems and the new PERS Chainless system.

ICE ERGO-LUXE SEAT

You'll have to try it to believe it! The Ergo-Luxe seat is the most comfortable trike seat on the market and the most comfortable you will ever sit on. Designed to provide the ultimate level of comfort and back support. Breathable fabrics maximise airflow, and ergonomically designed extra cushioning in the base and sides further enhance comfort. The Ergo-Flow seat is also available.

HIGH SEAT

A high seat position gives easy access to the trike, and a great view of the trail ahead and the scenery around you. The high seat position also makes it easier to get into and out of the trike. The recline of the seat can be easily adjusted to one of four different positions.

GROUND CLEARANCE

A high cruciform gives excellent ground clearance, ideal for road and trail use.

WIDER HANDLEBARS

The handlebars allow for a wider, roomier cockpit, and a handlebar clamping system with super secure indexed clamps to ensure the handlebars easily remain fixed in position at all times.

WIDTH	34.5" (875mm)
LENGTH	66.9" - 75.9" (1700mm - 1920mm)
WEIGHT FROM	36.7lbs (16.7kg)
SEAT HEIGHT	13.5" (343mm)*
SEAT ANGLE	45 - 51 degrees
RIDER WEIGHT LIMIT	330lbs (150kg)

*Seat height varies with trike specification.

FULLFAT

UNSTOPPABLE-UNCOMPROMISING-UNREAL

AVAILABLE WITH:

SHIMANO
E-BIKE
SYSTEMS

OPTIONS AVAILABLE

AN EXPEDITION-TOUGH TRIKE, ORIGINALLY DESIGNED FOR ANTARCTIC WORLD RECORD SETTING. THE ICE FULL FAT COMBINES A STRONG AND RELIABLE BUILD WITH SPECIALIST FEATURES FOR RIDING OVER CHALLENGING TERRAIN OR TO THE SOUTH POLE

TWO WORLD RECORDS FOR MARIA

In 2013 **Maria Leijerstam** became the first person in the world to cycle to the South Pole on the Polar Cycle built by ICE. She set the coast to pole human powered speed record of 10 days 14 hours. This world record still stands today. Traveling over 630km, cycling for up 17hrs a day in -29°C temperatures.

The ICE Full Fat is built on an optimised ICE frame featuring Compact Flat Twist Fold, No Brake Steer, Rider Positioning System, and wide range gearing.

OVERSIZED TYRES

Large volume, low pressure tyres give excellent float and traction over soft ground, sand, snow, mud and adventurous forest trails.

WIDE RANGE GEARS

Available with a variety of gear options, the Full Fat can be geared for even the most challenging terrain.

GROUND CLEARANCE

A high cruciform and three 26" wheels gives excellent clearance over rugged trails.

REAR SUSPENSION

Very effective, lightweight rear suspension is fitted as standard to give a comfortable ride.

C.F.T. FOLD

Built with the ICE Compact Flat Twist frame, allowing the trike to fold quickly and easily.

SHIMANO E-BIKE SYSTEMS

The Full Fat is available with two powerful Shimano E-Bike motor systems.

SECURE INDEXED HANDLEBAR CLAMPS AND EASY ACCESS SWEEP CRUCIFORM

The handlebar clamping system with super secure indexed clamps, ensures the handlebars easily remain fixed in position at all times. The easy access swept cruciform creates improved heel clearance and makes it easier to get on and off the trike.

ADAPTABLE

Mounting points make it easy to fit custom ICE racks, a wide range of bags and cycling accessories to the Full Fat.

WIDTH	38.8" (985mm)
LENGTH	76" - 84.6" (1930mm - 2150mm)
WEIGHT FROM	49.2lb (22.3kg)
SEAT HEIGHT	16.5" (420mm)
SEAT ANGLE	38 - 51 degrees
RIDER WEIGHT LIMIT	275lbs (125kg)

VERNA SAYS, "KEEP GOING"

ACCESSORISE, ADAPTABLE TO SUIT RIDERS NEEDS

All different people ride ICE Trikes, each rider is unique. Remarkable riders like Verna from Calgary, who is a quad amputee. She rides an ICE Adventure trike with a Shimano STEPS motor system. She says, the trike was the most comfortable she tried and it needed the least modifications to fit her needs.

ICE trikes are adaptable to suit each riders needs including people with cycling confidence issues, disabilities, fitness and medical rehabilitation or they simply want the most comfortable and accessible way to enjoy cycling.

Read more about Verna and many other trike riders on our website blog.

MADE FOR YOU

ALL ICE TRIKES ARE AVAILABLE WITH A WIDE RANGE OF OPTIONS AND ACCESSORIES TO FIT THE TRIKE TO YOU AND YOUR BODY

From seat brackets to adjust the leg length and seat height to the Helping Handles to assist you in and out of the seat, your ICE trike will be the perfect fit for you. Visit our website and online price lists to see the full range of accessories.

SEAT PROTECTION COVER & POUCH

The seat and integral neck rest protection cover helps keep the seat dry and protected from UV, rain, snow and dust. The elasticated design fits all Ergo seats and it can occasionally be sat on while riding. The pouch is more waterproof and ideal for storing small items. Fastens with Velcro straps. May fit other trike brands.

EASY FIT WRIST RESTS

The wrist rest with an optional support strap offer incredible comfort and support for riders who require that additional wrist support while riding. Great for touring or for riders who have limited wrist use.

SIDEPODS FOR ERGO-LUXE SEAT

The ICE Sidepods for Ergo-Luxe seat have all the standard features of the current Sidepods with an extra internal storage pocket and the new innovative mounting system that secures the Sidepods to the Ergo-Luxe seat without the need for additional over the seat straps.

NECK RESTS

NEW QR neck rests for 2026! The ICE neck rest, available on our Ergo-Luxe, Ergo Flow and Air Pro seats, incorporates a comfortable cushion, wider for Ergo-Luxe and Ergo-Flow seats. Our clamp offers a wide range of positions and once fitted the neck rest frame provides a handle to manoeuvre your trike. Available as an optional QR neck rest to allow for easy adjustment without tools.

FLAG AND MOUNTS

The Flag and pole High visibility flag with single piece pole for convenient storage. With ICE logo, reflective strip and eyelet for attaching streamers also additional flag mount to allow an alternative position from the built in seat holes.

FLAG EXTENDER

For Ergo-Mesh seats this raises the flag 300mm. The angle and height can be quickly adjusted using a new quick release clamp that fits to the top seat rail.

CHAINRING GUARD

The chain ring guard is an added safety feature that also prevents you from accidentally brushing against the oily chain rings.

SEAT RISER FOR ADVENTURE & HD

For Adventure and Adventure HD, the seat riser makes the seat 4 inches (10cm) higher. Perfect for those that find the normal seat heights just too low to comfortably mount and dismount.

LUGGAGE MOUNTS

The ICE side handlebar bag mount is built to fit a standard bicycle handlebar bag, perfect for storing your items and keeping them to hand without getting off your trike.

LIGHTING SYSTEMS AND NEW REAR BRAKE LIGHT

We offer lighting systems for our Shimano E-Bike trikes. Featuring a new quick release flag mount with integrated Supernova rear tail & brake light. The brake light automatically activates when braking. Powered by the Shimano motor system.

FRONT & REAR MUDGUARDS / FENDERS

ICE mudguards have been developed specifically for our trikes. Adjustable to accommodate different tyre sizes, they protect and look great.

QR FRONT WHEEL AXLES & DERAILLEUR HANGER

Quick release front axles which allow you to easily remove the front wheels on ICE trikes without tools. Available in disc or drum brakes options. Spare rear derailleur hangers are available for all current trike models.

LIGHT, COMPUTER & SENSOR MOUNTS

We offer a range of different ICE specific mounts. From mounting multiple lights to the front of your trike, to a central computer mount coupled with a sensor mount incorporated into the kingpost assembly.

MIRRORS AND MOUNTS

The Mirrycle mountain mirror is a 3" round, convex glass mirror with a wide field of view and ICE Accessory Mount attaches just below the hand grip providing you with a fixing point for your mirror.

SPARE PARTS

We have every ICE spare or replacement part you will ever need. From a brand new seat to a replacement pulley. Ready to ship anywhere in the world for super quick delivery.

BATTERY AND SECOND BATTERY MOUNTS

We offer battery mounts for for use with our Shimano systems. With and without racks, allowing easy and secure mounting of electric assist system batteries on trikes with and without suspension. A second battery mount is available to mount an additional battery on the back of the Ergo-Luxe and Ergo-Flow seats.

FF & FB BRACKETS

For the particularly tall or short rider the FF & FB bracket mounts can accommodate both extremes with ease. See our website for more information.

EASY ADJUST KITS

The Easy Adjust Chain Kit allows the boom length to be changed quickly to accommodate different riders without the need to change the chain or cable lengths.

BOTTLE CAGE RISER & BOTTLES

The ICE 750ml water bottle is a high quality, durable, and BPA free bottle, which fits perfectly in our n+1 black and white bottle cage. For easier access try our ICE bottle cage riser, which turns and raises the bottle cage towards the rider.

HELPING HANDLES

The ICE helping handles make getting in and out of your trike a breeze. The perfect accessory for those who need a helping hand.

PEDALS

We offer two types of pedal. Shimano XT with SPD cleat on one side and flat pedal on the other, or the Shimano SPD ES-600 pedal.

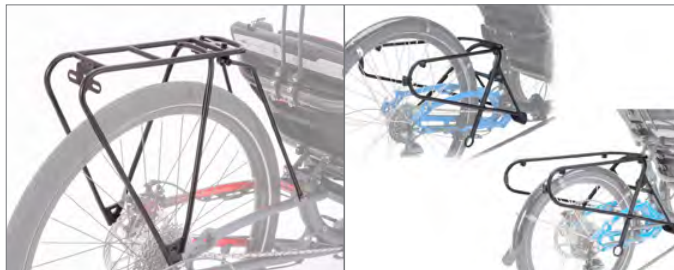

ICE TRIKES CLOTHING

We're excited to unveil our personalised clothing range - designed to celebrate ICE Trikes and the community behind it. Combining comfort with creativity, this collection lets you proudly show your love for ICE. T-shirts, hoodies, trucker caps and beanie hats, with more to come.

AIR-PRO SEAT

The Air-Pro carbon fibre seat is handmade in-house to the highest standards. It is a lightweight form-fitting seat which is stiff and strong, providing excellent power transfer. Available in two sizes to suit different riders. Finished with a foam core fabric cover with dual density foam tuned for maximum comfort.

REAR RACKS & PANNIERS

Our ICE specific rack has been tested to carry heavy loads and fit all standard panniers. Whether crossing continents or popping to the shop, let our rack take the load.

DEDICATED INNOVATORS

WE ARE MORE THAN RECUMBENT ENTHUSIASTS: WE ARE EXPERTS

We are responsible for many major innovations in recumbent design, including No Brake Steer, Road Response Suspension and Compact Flat Twist fold frames. We continue to use the latest technologies, finest materials, and traditional workshop craftsmanship.

DISCOVER

Everyone at ICE is passionate about recumbent trikes, and many of our ground-breaking ideas have come from riding the road or whilst working on the shop floor. As a close-knit, collaborative team, we are always sharing these moments of inspiration and setting them on the road to realisation.

DEFINE

During the definition stage, ideas are analysed and assessed. We explore the context that sparked the idea and ensure that we fully understand the issues involved. A design brief is prepared that clearly defines the situation, outlines the desired outcomes, and lays out a clear plan for how to progress.

DEVELOP

This is when the design and engineering team refine ideas into a solution. The team produces prototypes to explore and perfect. They test rigorously using Finite Element Analysis modeling and by putting prototypes to work on the road and down the trails.

DELIVER

At this stage ideas become reality. We work closely with specialist suppliers to manufacture components, ship them to our workshop and conduct rigorous inspection and pre-assembly processes. Every trike is built to order in Falmouth by our dedicated technicians, packed with care, and shipped to its new owner.

10 YEAR, TRANSFERABLE WARRANTY*

ON ALL NEW ICE TRIKES, ACTIVATE YOURS NOW!

ICE is proud to be able to now offer all new trikes will come with not just a free 10-year extended warranty, but now a fully transferable warranty!

The ICE 10-year warranty has been one of the most comprehensive warranties available for trike riders and gives you reassurance and confidence that your trike is a premium product and is built to last. Now, a second owner can also benefit from this peace of mind. Should you ever sell your trike in the future, a second owner can re-register the trike with ICE to receive the remainder of the warranty at no extra cost. It guarantees that the frame, seat, and steering components are free from material and manufacturing defects.
